(2) in the determination of "actual spill" as that term is defined in article I of the Rio Grande Compact, neither the spill of "credit water", as that term is defined in article I of the Rio Grande Compact, shall not occur until all San Juan-Chama project water stored in Elephant Butte Reservoir shall have been spilled; and

(3) the amount of evaporation loss chargeable to San Juan-Chama project water stored in Elephant Butte Reservoir shall be that increment of the evaporation loss from the storage of San Juan-Chama project water; the evaporation loss from the reservoir shall be taken as the difference between the gross evaporation from the water surface of Elephant Butte Reservoir and the rainfall on the same surface.
